

GOLONAHAL

GOLONAHAL

ABOUT US:

Golonahal is recognized as one of the most reputable companies in Iran for the cultivation and production of various seasonal flowers, ornamental plants, and houseplants. The company, with the aim of promoting the culture of floriculture and meeting market demands for high-quality flowers, has undertaken extensive activities since its early years of establishment. Since its founding, Golonahal has focused on developing its products by utilizing modern knowledge and innovative technologies in agriculture. The founders of this company, with several years of experience in gardening and agriculture, have successfully created a comprehensive center for the production and supply of various flowers. By relying on the expertise of experienced specialists and using the best seeds and seedlings, they offer high-quality products to the market.

Products

Golonahal proudly produces a variety of products, including:

Seasonal Flowers

- Includes flowers such as lily, rose, chrysanthemum, bridal bouquet, violet, etc.
- Suitable for gardens and public and private green spaces.

Houseplants

- Various ornamental plants suitable for indoor environments, such as petunias, sansevieria, pothos, and dieffenbachia.
- Designed to adapt to different lighting conditions.

Fruit Trees

- Production of various fruit trees, including apples, pears, peaches, apricots, etc.
- Providing consultation on planting, maintenance, and harvesting.

Ornamental Shrubs

- Includes various ornamental shrubs such as jasmine, Buxus, and flowering shrubs.
- Suitable for decorating green spaces and gardens.

Ornamental Shrubs

- Includes various ornamental shrubs such as jasmine, Buxus, and flowering shrubs.
- Suitable for decorating green spaces and gardens.

Production Process

Golonahal begins the production process using the best seeds and modern agricultural techniques. The production stages include:

- Seed Selection: Choosing the best seeds based on quality and resilience.
- Planting: Using suitable soil and ideal conditions for planting.
- Maintenance: Controlling environmental conditions such as temperature, humidity, and light for better plant growth.
- Quality Control: Standardizing and commercializing various plant protocols in the most equipped genetics laboratory.
- Harvesting: Timely harvesting of flowers to maintain quality.

Quality and Standards

Golonahal places special importance on the quality of its products by adhering to national and international standards in the production process. The company continuously works on research and development of new products to meet the diverse needs of customers.

Target Market

In addition to meeting domestic market demands, Golonahal pays special attention to exporting its products. The company exports its products to neighboring countries and other parts of the world and strives to gain a larger share of global markets.

Customer Services

The experienced team at Golonahal places great importance on providing consultancy services to its customers. The company's specialist team is ready to answer customer questions and needs, aiming to provide the best solutions for planting and maintaining plants.
